CMAX®
surgical table
New generation

CMAX® 3 & CMAX® 3-DRIVE surgical tables

CMAX[®] surgical table, a new generation of surgical table Advanced vision

This is not an evolution, it is a revolution.

STERIS is making history in innovative surgical tables, fully reworked and created precisely in line with the needs of all surgeons. The latest surgical table from the already successful CMAX[®] range opens up an even broader scope than before, with improved mobility and comfort for practitioners, whatever their discipline.

Once again, STERIS raises the bar and pushes the boundaries.

Evolution of the CMAX[®] surgical table

Launched in 2000

2006

2008

2016

| An exceptional surgical table

The CMAX® surgical table is available in two different models:

- **CMAX® 3 surgical table**
- **CMAX® 3-DRIVE surgical table (powered transfer)**

2018

CMAX[®] surgical table: see all of the innovations

110cm

58cm

The next step in excellence

- Universal multi-speciality surgical table
- Extra-low intervention positioning of 58cm without sacrificing the maximum height of 110cm (dual telescopic column)
- Two-way 454mm slide
- Optimal width table top - 52cm wide
- Radiolucent table top along the entire length
- Table top articulation offset to the column
- Narrow column centred under the table top
- Maximum weight capacity up to 500kg (centred on the column)
- Compatible with all existing CMAX[®] surgical table extensions and accessories
- Interchangeable headrests and leg positioners
- Excellent battery autonomy

In 3 words...

UNIVERSAL

An infinite ability to adapt to surgical interventions and specialities. The CMAX[®] surgical table can be configured in a moment thanks to its modular design and one of the largest catalogues of accessories and extensions on the market.

ERGONOMIC

The CMAX[®] surgical table is so easy to use you can forget it's there! It obeys the operators' every instruction from their fingertips so that they can concentrate on caring for their patients.

RELIABLE

The latest from the CMAX[®] surgical table range takes quality and durability one step further. All of the benefits can be seen from every angle: from the finish and the design, to the choice of resistant materials for quick maintenance and heightened durability.

Cmax

There's more to the CMAX[®] surgical table than meets the eye

Exceptional down to

EXCEPTIONAL MOBILITY

4 wide and double wheels offer excellent manoeuvrability in all directions, even when the patient is lying on the table top.

(1) Quality of materials

Electropolished stainless steel, high-performance aluminium and rustproof side rails.

(1)

(2)

(3)

STABILITY

Hydraulic system to compensate for uneven flooring, making for excellent stability (compensation of up to 8mm).

(3) Self-locking headrests and leg positioners

Hi-lock system.

(4) Dual power mains / battery

Battery charge status on hand control and table base.

COMFORT

Memoline MFOAM moulded or welded memory-foam cushion ranges (5 and 8cm for optimum patient comfort).

the finest detail

(4)

(5)

All functions within reach

The CMAX® surgical table includes a smart remote control with intuitive functions for steering, configuring, and viewing the selected movement and the position of the table on screen.

Smart remote

- Backlit colour display, ideal for endoscopic surgery
- Safety: vibrating anti-collision sensor (Auto Limit Sensor) to prevent the motorised sections from contacting the ground or table
- Hand Control with graphic information and position display
- Pre-programmed positions (e.g. bariatric surgery) with up to 8 programmable positions
- Dual-mode remote control: wired and Bluetooth® as standard

(5) Backup system

In the event of electrical failure, allows all main functions of the table to continue working.

(2) Unobstructed base

For optimised surgical access.

CMAX® 3-DRIVE surgical table: the performance of the CMAX® 3 surgical table with the addition of a central motorised wheel changes everything!

Powered transfer: a revolution in the surgical suite

Launched in 2006, STERIS' unique and innovative concept of powered transfer is much more than a new idea: it has completely redesigned the management of patient flow and opened up myriad new possibilities for organising the surgical suite. With powered transfer, **moving patients in and around the surgical suite becomes safe and easy.**

The CMAX® 3-DRIVE surgical table's motorised wheel

- 360° rotation of the base with no drift thanks to the central motorised wheel
- Slowdrive remote-controlled system: the table can move forward or reverse without the handle

Transfer handle

- Adjustable transfer speed: flexibility
- Easily switch between right-handed and left-handed mode
- Safety for patients and comfort for users

The patient journey redesigned

Optimise patient flow in your surgical suite

- Save time
- Save space
- Safety for patients
- Comfort for medical teams

- 
- 1 Surgical suite entrance airlock
2 Patient admission (**first transfer**)
3 Operating theatre
4 Recovery room (**second transfer**)
5 Decontamination room
6 Storage room

EXTENSIONS AND ACCESSORIES compatible with all surgical disciplines

The CMAX® surgical table line, in addition to its versatility in terms of disciplines, also offers a very broad range of extensions and accessories. These are compatible with the latest generations of the CMAX® surgical table. The STERIS catalogue of options and accessories are continuously being added to by the STERIS development team, fully in keeping with STERIS's quality standards and promise.

Convenient storage thanks to the STERIS range of accessory carts

CMAX[®] surgical table: versatile and modular to support the needs of all surgeons

What are the advantages of a low position?

to respond to the new surgical techniques such as visceral and abdominal surgery, endoscopy, or laparoscopy.

The widest flexibility of combined movements

- Trendelenburg/Reverse Trendelenburg: **45°/-30°**
- Slide of **454mm**
- Lateral incline **25°**
- Backrest articulation: **+90°/-90°**
- Minimum height of **58cm** (and down to **27cm** in extreme slide)
- Maximum weight of **500kg** centred on the column (270kg in all positions)

CMAX[®]: the surgical table that goes low for the best possible surgeon comfort and ultimate patient safety.

Low position

Motorised articulation of the pelvic section allows optimal access for the surgeon.

27cm

POSITIONS

Neurosurgery

Ventral decubitus position

For craniotomy by using a neurosurgery horseshoe headrest.

Adapter for speciality headrests (aluminium and carbon).

Seated position

Table top articulates to provide the patient with a comfortable and ergonomic position.

Visceral / general / laparoscopy surgery

The use of separate leg positioners, **LEG10C**, offers excellent access for the surgeon in laparoscopy interventions.

Motorised pelvic articulation

for perfect positioning in gynaecology and urology.

Gynaecology Urology

Lithotomy position
with LEGMATIC
leg positioners LEG20C

Lateral decubitus position
with extension for nephrectomy interventions.

Vascular

The ultra-long 454mm slide allows exceptional imaging access.

The carbon extension **EXTCARB** provides imaging clearance of 1280mm (from the head to the femoral artery or from the feet to the sternum).

Patented invention by STERIS: a sliding and removable elevator system

The **KCL01** elevator system can be shifted and adjusted in height throughout surgery. Its manual and intuitive control offers great precision of the adjustments, which is highly appreciated in spinal surgery by anterior approach. This device facilitates the placement of implants all the while ensuring that the patient's disc opening is maintained.

What are the advantages of a high position?

to respond to the needs of certain types of surgery, such as orthopaedic surgery.

The handle on the boot stirrup and the rotation on the traction unit allows for easy guided adjustment.

The traction unit is mounted on a cart that slides freely when unlocked.

| Orthopaedic and traumatology surgery

Orthopaedics and traumatology are complex and demanding disciplines, STERIS offers a range of extensions dedicated to the specific needs of these specialities the practice and techniques of which are in constant development.

The CMAX® surgical table configured with the orthopaedic extension ORT8000B has been designed to suit all lower-limb traumatology requirements and offers a solution for **M.I.S. techniques (minimally invasive surgery)**.

Positioning the bars is easy thanks to handles and rails incorporated at the end of the bar.

45° movements of the "3D" bar in all directions

Femoral nailing with lateral traction

Tibial traction

Completely radiolucent thanks to the offset traction unit and easy imaging access thanks to the "3D" bar.

The **HEAD04B** double-articulated headrest enables the patient's head to be optimally positioned

CMAX® surgical table also accepts the **ORT9000**, 2D traction system in **carbon fiber**.

Shoulder surgery

The **BAK05C** extension, which has been redesigned for enhanced ergonomics, has three articulations and the addition of a headrest, allowing precise and adjusted positioning with utmost patient safety.

Exclusive EasyLock system (automatic directional lock)

Use of a specific motorised backrest enabling the patient to be positioned with utmost safety. Certain parts are removable and allow the shoulder to be freed to offer better access to the surgeon.

Arm and hand surgery

Carbon fiber table **TAB260CF**, a light and radiolucent material.

POSITIONS

I Bariatric and visceral surgery

Exceptional performance in terms of patient weight capacity for bariatric and abdominal surgery.

500

52cm table top, extendable
up to 72cm with width
extenders (optional)

I Ophthalmology / ORL

The low position (58cm)

allows better access and optimal comfort for the surgeon when using a microscope.

The **HEAD07** headrest allows optimised positioning thanks to its double articulation.

HEAD06B

BACKORL

STERIS offers a range of headrests for every speciality.

A surgical table made in Europe

The CMAX[®] surgical table is distributed all over the world but made in France, on a site that produces a wide range of equipment for surgical suites.

Our quality requirements:

- Proximity and heeding the specific needs of French and European users
- Full control of industrial processes and the quality of the product
- Integrating the best European suppliers, giving preference to local suppliers
- Monitoring products and adapting them to the needs of our users
- Capitalising on the knowledge and knowhow of French engineers and technicians

Mechanical features:

• Raising/Lowering.....	1100mm/580mm (travel 520mm)
• Left lateral incline/Right lateral incline.....	25°/25°
• Trendelenburg/Reverse Trendelenburg.....	45°/-30°
• Raising back/Lowering back.....	90°/90°
• Head/Feet slide.....	224mm/230mm (travel 454mm)
• Flex/Reflex.....	-220°/120°
• Length of table top (without extension).....	840mm (2025mm with separate headrests and leg positioners)
• Width of table top.....	520mm (560mm rails included)
• Maximum patient weight + accessories.....	270kg
• Maximum raising/lowering capacity.....	500kg horizontal table top, with centred slide and load
• Floor clearance/Wheel diameter.....	16mm/100mm

THE STERIS PROMISE

STERIS offers a wide range of services:

- Installation
- Connection
- Start-up
- Training (on client site or in Bordeaux)
- On-site intervention
- Technical assistance
- Plus a range of service contracts

Easy maintenance:

CMAX[®] surgical table is equipped with a PC connection port to make diagnostics easier through proprietary software called Eserve.

The factory for our operating lights, surgical tables, distribution arms and washers is based in Le Haillan, France (33).

STERIS, a major player in the healthcare sector

With more than 12,000 employees worldwide, STERIS is a major player in the healthcare sector. Partnering with more than 25,000 clients in over 90 countries, STERIS offers an all-in approach for the entire surgical suite with ORigami™: from surgical tables, operating lights, integration systems, and distribution arms, to partition walls, doors, sinks, laminar flows and much more. Everything is focused, coordinated and optimised to offer a remarkable quality of service every single day. STERIS also offers infection prevention technologies through STERIS IPT (Infection Prevention Technology: washers, disinfectors, sterilisers and consumables.
