

SafMed Aseptor Bags

SafMed Aseptor Bags are locally manufactured from a special medical grade paper which forms a bacteria barrier and are used to enclose items to be sterilized. It has a distinctive process indicator which changes colour when exposed to steam cycles. All SafMed Aseptor Bags conform to internationally recognized standards ISO 11607-1 and tested to SANS 50868-3:2010. SafMed Aseptor Bags are meant for use in Steam Sterilization Cycles only.

Features:

- High paper quality & strength of side seals
- Process indicator ink performance.
- Manufactured in South Africa
- Available in a wide range of sizes
