

It's about seeing more ... clearly

Multi-Image Capacity* is the simple, integrated solution for displaying multiple images on one monitor.

The visual information you need to help monitor the OR and make critical, timely decisions can be seen more clearly with Multi-Image Capacity, a seamlessly integrated feature built into the Harmony iQ® 3600 Integration System that allows viewing up to four images on one screen. It's simple to use, requires no additional space and is built right into the touchscreen user interface.

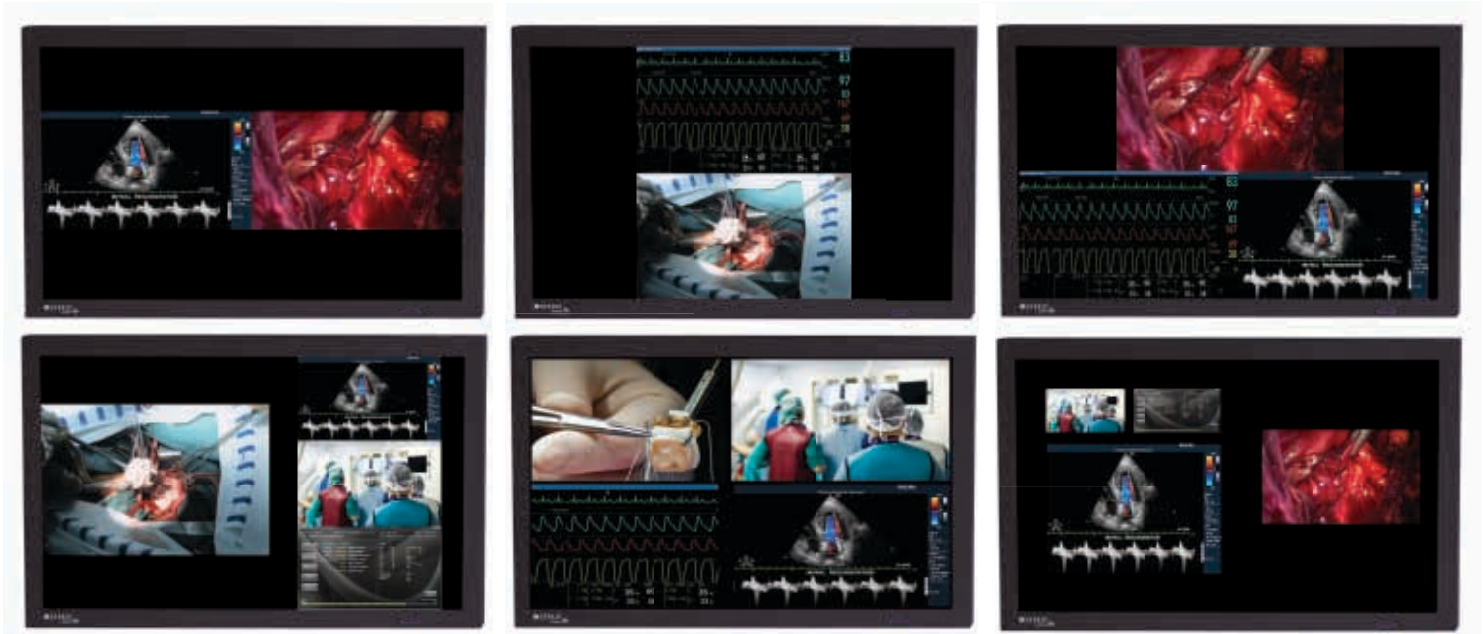

Harmony iQ® Integration Systems
Simplify today. Embrace tomorrow.
