

LAMPS

A whole new way of lighting patients' bedsides

AIRport lamps are a functional and elegant solution for examining patients, reading and writing records, carrying out prep work, and performing other tasks at patients' bedsides.

They deliver high-quality light and protect patients and staff from electrical hazards. Their sleek design blends in seamlessly with patients' bedsides.

• Lamp types:

- Examination
- Multifunction: the same lighthead combined with a powerful examination lamp and a soft reading lamp

• Lighting technology:

- Halogen
- LED

• Arm types:

- Flexible
- Double joint
- Triple joint

• Brightness levels:

- From 22,500 lux at 500 mm to 48,000 lux at 500 mm

STERIS QUALITY

• Safety:

- Reinforced protective front glass
- Protected transformer and wiring

• Ergonomics:

- Handle for easy and safe positioning
- Switch on shade
- Easy bulb replacement

• Design :

- Rounded corners for easy cleaning and disinfection
- Blends in seamlessly with hospital environments and ICUs

• Examples
